Executive Summary

I am passionate about building intelligent, data-driven solutions to solve real-world problems and improve efficiency. I seek a technology-focused role to apply my skills in software development, AI, and problem-solving. The role aligns with my technical background, analytical approach, and hands-on project experience. With a strong learning mindset, I aim to contribute effectively and grow with the organization.

Education

Bachelor of Technology	08/2024 – 04/2028
COIMBATORE INSTITUTE OF TECHNOLOGY (AI&DS) CGPA : 9.16	Coimbatore , India
Secondary School Leaving Certificate	06/2010 – 05/2022
MLM Mamallan – Matric Higher Secondary School ☒ Percentage : 94%	Kanchipuram , India
Higher Secondary School	06/2022 – 05/2024
MLM Mamallan – Matric Higher Secondary School ☒ Percentage : 90.5%	Kanchipuram , India

PROJECTS

Acoustic Canopy IoT/Arduino Project, Project Lead	02/2025 – 05/2025
- Built an Arduino-based system that detects air pollution levels using specific sensors and purifies air with charcoal filtering. - Integrated real-time mapping and automated fan control to enhance environmental safety. - Collaborated in a 5-member team, following Agile-style task planning.	Coimbatore , India
Maximizing Section Throughput Using AI-Powered Precise Train Traffic Control	08/2025 – 09/2025
- Created an SRS document for a railway operations management system under Smart India Hackathon - Defined problem statement, functional & non-functional requirements, and use cases - Designed UML diagrams to represent system architecture and workflows	Coimbatore , India
AI Socialmedia Automation	05/2026 – 06/2025
- Developed an AI-powered social media automation platform that generates captions, hashtags, and content suggestions from images using Computer Vision and NLP. - Built a full-stack application using React and FastAPI with multi-platform social media integration to automate content publishing and streamline workflows.	Coimbatore , India
Gold Rate Prediction Machine Learning Project	11/2025 – 11/2025
- Developed a gold price prediction model using Random Forest Regression and historical market data. - Conducted data preprocessing, feature engineering, and exploratory data analysis to improve prediction performance. <i>(Individual Project)</i>	Coimbatore , India

EXPERTISE

Programming Languages

- Python
- C
- DBMS

Web Development (Frontend)

- HTML
- CSS
- JavaScript

AI & Data Science

- Pandas
- NumPy
- Scikit-learn

Machine Learning

- Google Colab
- TensorFlow

Data Visualization

- Seaborn
- Matplotlib

Project Management

- GitHub

Soft Skills

- **Communication & Collaboration:** Strong verbal and written communication with the ability to work effectively in diverse teams.
- **Problem Solving & Critical Thinking:** Analytical mindset for identifying issues, evaluating options, and implementing data-driven solutions.
- **Adaptability & Time Management:** Flexible in fast-changing environments while meeting deadlines and maintaining high quality.

Certificates

AI Fundamentals

Gained foundational knowledge of artificial intelligence concepts, machine learning principles, and real-world applications, including hands-on practice with Python-based AI tools.

Perpetual Fest 2025

Recognized for designing and building an IoT system using Arduino sensors to detect and analyze air quality, trigger automated purification with charcoal filtration, and integrate real-time mapping for data visualization.

Smart India Hackathon

Smart India Hackathon Project: Secured **3rd place in the department**; prepared SRS document including problem statement, requirements, use cases, and UML diagrams for a railway operations management system.

Languages

- English
- Tamil

Responsibilities

School Sports Leader

Acted as a team leader, facilitating collaboration and discipline among members.

Career Director

Coordinated career development initiatives and technology tool exploration for students.

Google Developer Group (GDG), Development Team Member

Collaborating on technical projects and supporting developer-focused events and innovation.
